TECHNICAL EXPERIENCE

Searchspring Toronto, Ontario

Solutions Engineer **2023-2024**

- Analyze, review and confirm feasibility of project requirements based on data provided
- Perform data setup for client projects. Resolve and identify any data issues and advise on feasible solutions/approaches to facilitate client requests
- Write scripts to manipulate data for various e-commerce platforms to facilitate client-requested features

Nextopia/Searchspring Toronto, Ontario

Technical Support Engineer **2019-2023**

- Resolve issues and add new functionality to client sites using frontend technologies (AngularJS, React, HTML, CSS, Git, Twig,) and backend technologies and data formats (PHP, Groovy, CSV, XML, JSON, various APIs)
- Write scripts to modify data obtained via data acquisition systems
- Investigate a wide array of issues related to frontend UI, data acquisition, search relevancy, data configuration
- Problem solving across several Ecommerce Platforms (Shopify, MIVA, Magento, BigCommerce, Volusion etc) and various site integrations
- Studied and applied new technologies and tools such as jq, bash, python, datadog, visidata, pandas to more effectively complete tasks and solve problems. Provided simultaneous support for two different site solution platforms (Nextopia and Searchspring)

EDUCATION AND PROFESSIONAL DEVELOPMENT

Brock University St. Catharines, Ontario

Bachelor of Science (Honours) Computer Science **2012-2018**
